

ELECTRIC SOLDERING IRONS

VASCO

All Vasco Irons carry Underwriters Approval and are guaranteed for one year against faulty workmanship and defective materials.

Outstanding VASCO Features

1. An efficient, well-balanced, streamlined design; no unnecessary bulk.
2. The VASCO radiator bushing (patented) keeps handle cool.
3. Non-oxide copper tip, of plunger type—for efficient heating.
4. Chromed steel core heating element, wound with **Nichrome V ribbon**.
5. Insulated with superior grade Amber mica, checked for thickness.
6. Compression wound iron wire covering protects the element.
7. A compact, efficient terminal connection and strain relief.
8. Approved by Underwriters' Laboratories, and tested in our own factory with 1000 volt breakdown test as final check.
9. Equipped with 6 foot 10,000 Cycle Approved Cord and Plug.

No. 85 Draws 85 Watts

No. 85—A brand new iron in the VASCO line for high speed soldering on wiring and other light electrical work. Furnished with $\frac{3}{8}$ inch Diamond Shape Copper Tip. Shipping weight 2 pounds. Each\$5.50

No. 100 Draws 100 Watts

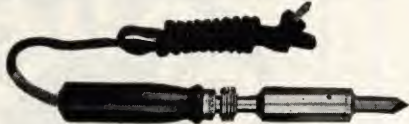

No. 100—Used exclusively by radio factories, telephone switch-board work and other light duty production jobs. Furnished with $\frac{3}{8}$ inch diamond Shape Copper Tip. Shipping weight 2 lbs. Each\$7.20

No. 150 Draws 130 Watts

No. 150—A medium weight iron for chassis spotting, radio work, small metal parts. Provides the extra heat needed for many jobs. Furnished with $\frac{1}{2}$ inch Diamond Shape Copper Tip. Shipping Weight 2 lbs. Each\$7.50

No. 180 Draws 200 Watts

No. 180—An excellent iron for general shop and garage use. Large enough for light sheet metal work, and auto electricians. Furnished with $\frac{5}{8}$ inch Diamond Shape Copper Tip. Shipping weight 3 lbs. Each\$8.60

No. 300 Draws 300 Watts

No. 300—Used extensively for sheet metal work, small motor factories, general service and production work. Furnished with $\frac{7}{8}$ inch Chisel Point Copper Tip. Shipping weight 4 pounds. Each\$11.50

No. 500 Draws 500 Watts

No. 500—A heavy duty industrial iron for hard service. Used by tin shops, coppersmiths and other production jobs requiring a heavy iron. Furnished with $1\frac{1}{2}$ inch Chisel Point Copper Tip. Shipping weight 5 $\frac{1}{2}$ pounds. Each\$17.50
All above Irons for 110-120 volt A.C. or D.C. operation.

ELECTRIC SOLDERING IRONS

Vasco Challenger

The CHALLENGER line of irons are of good quality recommended for light duty suitable for the occasional user. Underwriter approved.
